

# UNITED STATES FORENSICS

JUSTICE THROUGH TECHNOLOGY

## THE FORENSIC PROCESS

**Identification:** Evidence is identified and documented. A strong chain of evidence is established.

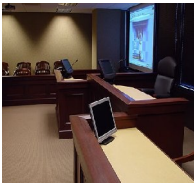

**Preservation:** Evidence is preserved as close as possible to its original state.

**Analysis:** Evidence is analyzed to extract the relevant information and recreate the chain of events.

**Presentation:** Evidence is presented in layman terms with technical documentation.

## COURT ROOM MULTI MEDIA

**What We Can Provide:** Our Comprehensive reports provide clear, concise, and easy to understand details of our forensic exams. We also provide sworn testimony on how we achieved our results and what calculations were used. Trial exhibits include high quality photo quality posters as well as DVD & Computer Presentations.

## OUR PHILISOPHY

**We Provide** expert, court approved, high tech examinations, litigation support & IT consultations.

**We Give** our clients timely and professional service, while ensuring that our analysis exceeds the rules of evidence and our clients expectations.

**We Are Experienced** in courtroom preparation and testimony. Our reports are comprehensive yet understandable and have been proven in legal proceedings.

## FREE CONSULATION

Technology based forensics is a complicated field, and each case is unique. Call today to set up a confidential consultation with one of our examiners. Phones are answered 24x7, Please call today 727-231-0112.

## NATIONWIDE SERVICES

**Our network** of Certified Examiners extends to all 50 states. Many of our services can be facilitated via overnight couriers and our technology includes state of the art remote support via the world wide web. For a complete list of cities supported please visit:

## COMPUTER & CELL PHONE FORENSIC SERVICES

### Professional & Experienced:

Don't trust your fragile data to a novice. Improper recovery techniques can easily destroy the very evidence your trying to recover! Most IT trained personnel simply lack the forensic training necessary to withstand scrutiny in a court of law.

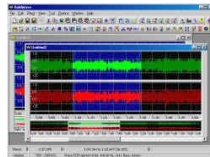

**State Of The Art Technology:** Advances in both hardware and software allows our technicians to recover as much data as possible in the shortest possible time.

**A Wealth Of Information:** Our experts can recover deleted data, emails, chat rooms, internet history, internet caches, activity logs, pictures, documents, financial information, temporarily files, and much more. Evidence recovery is completed in a forensically safe manner, detailed logs and reports are kept for all procedures.

## VIDEO & AUDIO SERVICES

**Video Services:** We can enhance digital or analog video to smooth edges, sharpen picture, remove static, adjust brightness or darkness, remove interlacing, create stills, remove multiplexing, and much more. Formats available to convert to or from are DVD, VHS, DV, VCD, SVCD, and any computer multimedia formats.

**Audio Enhancements:** We can take your tape, remove the noise, boost the proper frequencies so that the sounds you want or need to hear come through audibly. If you have low volume, or hard to understand surveillance or evidence tape, this is the service you need.

**Forensic Discipline:** As with other areas of forensics, technique is all important. We follow strict guidelines to ensure evidence preservation, chain of custody, and scientific duplication.

## 3D ANIMATION

**Crime Scene Recreation:** Our technology can recreate any crime scene in amazing 3D accuracy. Once created the event in question can be viewed from any angle, even "Fly Through" camera motion. Events can be viewed in slow motion and objects can be zoomed in upon. Even more amazing this technology can go places a camera never could such as inside the human body or down to the molecular level.

**3D Graphics:** Any object can be reproduced in high quality 3D vector graphics. Multiple objects can be shown how they can or can not interact together.

### Forensic Artist For Expert Evidence

Our artists will work with your expert witnesses to maximize their testimony with 3D Animation and Graphics.
